A good investment if part of a collection. If your like me and prefer weapons over parts, because at least you can sell them and get a lot of money or Gold back. Then you would have stock paid a lot of parts for when you have a lot of money spare to evalulate them and combine them all in one go. AS the yare only temperary unlike the frist game and the story mode of this game. Storage upgrade Part 2 (the seond you buy) and Part 3 (the thrid one you buy) are only really good if you stock pile a heck of alot of parts or weapons to be Evaluated.. Slots for albums? ...Really?
