Fun but gets boring after about 10 minutes. I like Dev Guy. Its a mildly humorous game steeped in parody. and over all its pretty short. Its definitely a free game to pick up and play through in the little bit it actually takes to complete!. A solid premise, destroyed by terrible beat detection. More often than not this flaw makes play next to impossible. If you want a real music game, buy Beat Hazard and never look back.. The multiplayer mode is super awesome! I've played it with some friends and we totally got addicted to it! <3 Because the multiplayer mode is local I could physically block my friends like I used to back in the good old days :P

Ahhhhh sweet, sweet memories...

I would definitely recomend this game for some hectic fun with your friends!. First VR Only then Nothing . Even Fullscreen dont Work .. No way i want this. Any negative review or prior negativity towards this game from me was due to my ignorance of what is known as "4K" and technologies like "AMD Freesync" and "1 ms" and "144hz."

Buy it. Enjoy it. Chill with it. I'll review it when I can get a break from it. Buy it.

Review to come.... This is the best hidden object, point and click game that I have played on steam. It has a very creepy storyline and some new puzzles. I actually had to skip two because I just couldn't work them out. I got around 6hrs play including the bonus chapter. The characters mouths moved, and the extras such as moaning and hyperventilating made this game exciting. There are not that many hidden object scenes, but they were good with some puzzles within them. The only thing I didn't like was that there was no teleport feature. It was annoying running back and forth, but the game would have finished a lot earlier without it. I still recommend it.. Its fun. Its a simple idea which is fun just to experiment and blowing your dummy up in many different ways.

Its a good little timekiller.. Kept ♥♥♥♥ing killing myself 10/10
. bad is bad Where the nudes!?

Interesting Asteroids style game with a ton of mechanics going on. Definitely worth it at \$2 if it looks like your sort of thing.

I highly recommend toning down some of the visual effects.. It is a fun and addictive arcade game in its purest form. Collect as much energy as possible without dying. The controls are slick and the entire game factors in momentum and some physics. You don't have weapons by default. But you can use power ups to attack bandit ships, and lead them in to hazards. The game costs less than one US dollar and its a lot of fun. It has that "one more try" factor.. I Download it but dobt know that it is paid ☹☹. Good old game, thou it gets boring fast 7/10. yes/10 would kill a llama to play this. game would be better with multiplayer. It is a fast pace RPG PvZ. Gameplay can be challanging, but if you have trouble you can redo some levels to gain cash to upgrade weapons to make it easier. Story is funny at times, bland at times. The artwork is great, I sometimes sit and look at them a while.

Only thing I don't like is that cash can be hard to get, so getting all the achievements could take a while unless it becomes much easier later in the game.

If you like anime and a tower defense-like game, it is worth a try.. At a friends request and thanks to his generous gift I played a little Agricultural Simulator tonight. This game has got to be the biggest joke I have ever installed.

- * The stoned looking dog whom I can only assume was supposed to be my traveling companion constantly barked and his footsteps were always following me yet he never left his position by his food bowl.
- * The tractor was way too slow and was unsuccessful at running over animals, people or structures.
- * The fastest way to get around in the game was by running diagonal and although you could not jump you could get massive air by running crooked at the back of the tractor.
- * Whilst trying to see if I could open the door to a random pizzeria the game crashed.
- * The chickens were clearly ghost chickens that could pass through any object.

But my favorite part was the bull that despite having access to an open gate decided to leave his enclosure by means of warp-glitching slowly through the fence.... Well at least he had realistic testicles.. The game has an interesting story, its really short but amazing there were a few glitches and bugs that I encountered but so far its a good game.

A suggestion:

Add a feature that lets you adjust you mouse sensitivity.
